

GOVERNMENT OF INDIA

**Medium-term Expenditure Framework Statement
laid before Parliament as required under the
Fiscal Responsibility and Budget Management
Act, 2003**

(August, 2018)

PREFACE

Section 3 of the Fiscal Responsibility and Budget Management (FRBM) Act, 2003 requires the Government to lay the Medium Term Expenditure Framework (MTEF) Statement in both Houses of Parliament. The Statement has to be laid in the session immediately following the session of the Parliament in which the budget has been presented.

The MTEF Statement sets a three-year rolling target for the expenditure indicators with specification of underlying assumptions and risks involved. The objective of the MTEF is to provide closer integration between Budget and the FRBM Statements. It gives a medium term perspective to Central Government finances and specifies a path for Government's fiscal consolidation.

Form F-3, Rule 4 of the Fiscal Responsibility and Budget Management Rules, 2004 specifies the format for presenting the MTEF Statement. It includes an estimate of expenditure commitments with demand-wise sectional classification (Revenue and Capital), and expenditure projections for certain schemes of the Government.

Beginning 2018-19, Sections A and C of the MTEF Statement also provide the Provisional Actuals for the previous year, i.e. 2017-18, alongwith RE 2017-18. Efforts have been made to incorporate unavoidable expenditure commitments of Ministries/ Departments in their respective medium-term projections. It is expected that this will provide fixed goalposts to the Ministries/Departments and facilitate expenditure planning with a medium-term perspective.

MEDIUM-TERM EXPENDITURE FRAMEWORK

A. MEDIUM-TERM EXPENDITURE PROJECTIONS (Major category wise)

<i>(Figures in ₹ crore)</i>					
	Revised	Provisional	Budget	Projection for next	
	Estimates	Actuals	Estimates	two years	
	2017-2018	2017-2018	2018-2019	2019-2020	2020-2021
Revenue Expenditure					
1. Salary	1,51,129	1,50,511	1,58,547	1,66,471	1,74,798
2. Interest	5,30,843	5,29,243	5,75,795	6,21,859	6,71,607
3. Pension	1,47,438	1,45,789	1,68,518	1,79,747	1,84,814
4. Subsidies					
a. Food	1,40,282	1,00,316	1,69,323	1,87,597	2,07,730
b. Fertiliser	65,000	66,441	70,090	74,997	80,246
c. Petroleum	24,460	24,352	24,933	26,678	28,546
5. Centralised Provision for Grants to States	1,15,497	1,03,902	1,36,874	1,46,455	1,56,706

B. ASSUMPTIONS UNDERLYING THE MEDIUM-TERM EXPENDITURE PROJECTIONS

The growth in Gross Domestic Product (GDP) at constant (2011-12) market prices for the year 2017-18 was estimated to be 6.7 per cent (provisional estimates), as against 7.1 per cent in 2016-17. The growth in Gross Value Added (GVA) at constant (2011-12) basic prices in 2017-18 was estimated at 6.5 per cent, as compared to the growth of 7.1 per cent in 2016-17. At the sectoral level, the growth rate of GVA at constant basic prices for agriculture & allied sectors, industry and services sectors in

2017-18 was 3.4 per cent, 5.5 per cent and 7.9 per cent respectively. The corresponding growth rates during 2016-17 were 6.3 per cent, 6.8 per cent and 7.5 per cent respectively.

The growth of private final consumption expenditure and government final consumption expenditure at constant (2011-12) prices was estimated to be 6.6 per cent and 10.9 per cent respectively in 2017-18, as compared to 7.3 per cent and 12.2 per cent in the previous year. The growth of gross fixed capital formation at constant prices in 2017-18 was estimated to be 7.6 per cent vis-à-vis 10.1 per cent in 2016-17.

Inflation based on Consumer Price Index (Combined) has been declining continuously for the last four years. Headline CPI inflation declined to 3.6 per cent in 2017-18 from 4.5 per cent in 2016-17, 4.9 per cent in 2015-16 and 5.9 per cent in 2014-15. Inflation based on the Wholesale Price Index averaged at 2.9 per cent in 2017-18 as against 1.7 per cent in 2016-17, (-) 3.7 per cent in 2015-16 and 1.2 per cent in 2014-15.

During 2017-18, merchandise exports valued at US\$ 303.3 billion were 9.9 per cent higher than the level of US\$ 275.9 billion in 2016-17. Merchandise imports during 2017-18 were US\$ 464.7 billion, which was 20.9 per cent higher than the level of US\$ 384.4 billion in 2016-17. The trade deficit in 2017-18 was US\$ 161.4 billion as against US\$ 108.5 billion in 2016-17. Oil imports increased from US\$ 87.0 billion in 2016-17 to US\$ 108.6 billion in 2017-18. Non-oil imports increased by 19.7 per cent to US\$ 356.1 billion in 2017-18 from US\$ 297.4 billion in 2016-17.

India's Current Account Deficit increased to 1.9 per cent of GDP in 2017-18 from 0.6 per cent in 2016-17 on the back of a widening trade deficit. Net invisible receipts were higher in 2017-18 mainly due to increase in net services earnings and private transfer receipts.

India's foreign exchange reserves increased to US\$ 424.5 billion at end-March 2018 from a level of US\$ 370.0 billion at end-March 2017. During 2017-18 the average exchange rate of the Rupee vis-à-vis the US dollar was ₹64.45 per US\$ as compared to ₹67.07 per US\$ in 2016-17.

MTEF Projections

The MTEF projections are based on the following assumption.

	2018-19	2019-20	2020-21
GDP growth (Nominal)	11.6 %	11.8 %	12.3 %
GDP growth (Real)	7.3%	7.5%	7.8%
Fiscal Deficit /GDP	3.3 %	3.1 %	3 %
Gross Tax Revenue/GDP	12.1%	12.1 %	12.1 %

The Medium Term Fiscal Policy Statement projects fiscal deficit targets as 3.1 percent in 2019-20 and 3 percent in 2020-21. This is in line with the FD targets in the Fiscal Responsibility and Budget Management Act, 2003. As per Section 4 (1)(a) of the amended Act, the Central Government shall take appropriate measures to limit the fiscal deficit upto three percent of the GDP by 31st March, 2021.

The Fiscal Responsibility and Budget Management Act, 2003 was amended vide the Finance Act, 2018 (Act 13 of 2018). The focus of fiscal legislation is curbing the fiscal deficit and limiting the Government Debt. The target dates have been fixed as March 31, 2021 for fiscal deficit and March 31, 2025 for government debt. Revenue Deficit and Effective Revenue Deficit have been removed as parameters for targeting fiscal outcomes since at the stage of development that India is at present investments in education and health (which are revenue in nature) are as important as investments in physical capital. The amended FRBM Act, also stipulates a General Government debt target of 60 percent to be attained by the States and Central Government by March 31, 2025.

The fiscal deficit for 2017-18 was targeted at 3.5 percent of the Gross Domestic Product in MTFP Statement 2018. As per the Provisional/Unaudited Accounts for the year 2017-18, published by Controller General of Accounts, the FD target has been met. The Revenue Deficit, which was targeted at 2.2 percent of GDP, stood at 2 percent at the end of the year 2017-18.

In MTFP statement, Gross tax revenue receipts were estimated to be 11.6 percent of GDP. Total Receipts under GTR for 2017-18 were ₹ 19,19,182 crore (prov.) which was about 11.4 percent of GDP. The reduction in GTR is mainly on account of lower receipts under indirect taxes. One of the main reasons for this reduction was because in the GST regime, the taxes of a month become due on the 20th of the succeeding month. Due to this, GST for March, 2018 became due in April, 2018 leading to lower GST receipts in the year 2017-18.

Direct Taxes for 2017-18 (₹9,91,289 crore) (prov) showed a growth of 19 percent over 2016-17. An amount of ₹11,072.10 crore on account of Wealth Taxes, Income Declaration Scheme and Equalization Levy was also realized as part of the 'Other Taxes' component under CGA Accounts. The Direct Taxes component in 2016-17 was ₹15,473.61 crore.

Goods and Services Tax (GST) was introduced from 1st July, 2017. GST is an ad-valorem, destination based tax, which subsumed most of erstwhile indirect taxes prevailing in the country. Prior to implementation of Goods and Service Tax (GST), indirect tax receipts mainly comprised receipts from Customs, Union Excise Duties

and Service tax. In the GST regime, intra-state sales of goods and services attracts State GST/CGST/UTGST, and inter-State supply of goods and services attracts IGST (Integrated Goods and Services Tax). The CGST is levied and collected by the Centre. A GST compensation cess, to compensate revenue losses to states, has also been introduced.

BE 2017-18 for indirect taxes was ₹9,26,900 crore, which was revised at RE stage to ₹9,37,799 crore. The actual receipts in 2017-18 were ₹9,13,032 crore, which implied a growth of 6.12 percent over the year 2016-17.

The tax receipts are expected to be buoyant in the medium-term. This buoyancy is anticipated partly because of the better tax administration. Another reason is the attempts to increase the individuals covered under the tax net. The underlying assumptions for taxes mostly remain unchanged since the presentation FRBM Statement with the Union Budget 2018-19. Goods and Services Tax is a new tax regime encompassing central and State levies. GST revenues are expected to rise with the expansion in the tax base due to increase in the number of tax returns under GST.

1) Revenue Expenditure

Revenue Expenditure is budgeted at 87.7 percent of the total expenditure in the year 2018-19, and 11.44 percent of the GDP. It is expected that this proportion will go down to 87.16 percent of the Total Expenditure and 10.86 percent of the GDP by 2020-21. The projections for major components of revenue expenditure are listed below, along with a brief write-up.

a) Salaries:

The salaries mentioned in the MTEF statement relate to salary, and Grant-in-Aid salary, paid by the Union Government. This category of Revenue expenditure does not include the salary paid to the Military personnel under Defence Ministry. The growth rate in salary 2018-19 over the Revised Estimates of 2017-18 is just under 5 percent.

It is anticipated that salaries, and Grants-in-Aid salaries, will increase by about 5 percent over Budgeted Estimates of the year 2018-19. Same rate of growth is also expected in the year 2020-21. This assumes that an increment of 3 per cent and a Dearness Allowance increase of 2 per cent will have to be provided to all employees under both Salaries and Grant-in-Aid Salaries. The projection in absolute terms is ₹1,66,470.90 crore and ₹1,74,797.72 crore for the years 2019-20 and 2020-21 respectively.

b) Pension:

Another major component of Revenue expenditure is Pensions. For the purpose of MTEF projections, the expenditure on pension payments includes civil pensions and Defence pensions. For the purpose of calculation of Pensions, it is assumed that pension commitments will increase by around 7 percent over the budgeted estimates on 2018-19 in the year 2019-20 and 7 percent over that in the year 2020-21. The Pension commitments have been budgeted at ₹1,68,518.02 crore in 2018-19. In absolute terms, they are expected to increase to ₹1,79,746.50 crore in the year 2019-20 and to ₹1,84,814.36 crore in the year 2020-21.

c) Defence:

The revenue component of Defence expenditure comprises salaries of Defence personnel, and other establishment expenditure. It may be noted that Defence pension is not a part of this component in the MTEF statement. Defence pension is included in the Pension category of Revenue for the purpose of preparing this Statement. The Budgeted expenditure under revenue component of defence expenditure is ₹1,92,434 crore in 2018-19. This is projected to increase to ₹2,05,975 crore in 2019-20 and ₹2,20,467 crore in 2020-21. This suggests an increase of 7 percent over previous year for 2019-20 and 2020-21.

d) Interest Payments:

Interest Payments have been estimated in BE 2018-19 at ₹5,75,794.95 crore. This represents an 8.8 per cent increase over the Provisional Actuals of 2017-18. In 2019-20, the interest payments have been projected to be ₹6,21,858.55 crore which represents an 8 per cent increase in the net interest payments outgo of the Government. The projected interest payment outgo for is ₹6,71,607.23 crore for 2020-21. As a percentage of total revenue receipts of the Centre, the interest payments outgo present a picture of gradual decline. Compared to the Provisional Actuals for 2017-18 of a proportion of 37 per cent, it declines to 33.4 per cent in BE 2018-19 and to 32.4 per cent and 31.2 per cent in 2019-20 and 2020-21. Interest payments as a proportion of GDP are anticipated to follow a gentle downward slope from the provisional actuals figure in 2017-18 of 3.2 per cent to 3.1 per cent in 2018-19, 3.0 per cent in 2019-20 and 2.9 per cent in 2020-21. The fiscal consolidation path envisaged in the Fiscal Policy Strategy Statement and the Medium Term Fiscal Policy Statement, is expected to aid the general direction of the trajectory anticipated here.

These figures assume that inflation will be within the limits set by RBI's inflation targeting framework and hence inflationary expectations are kept in check. One other source of upward pressure, especially on the interest payments Object

Heads (OH), but only of a minor variety will be the interest payments impact of the Extra-Budgetary Resources, being planned by various departments of the Government of India.

e) Major Subsidies :

Status

Total subsidy as a percentage of GDP has come down from 2.16 percent in 2013-14 to 1.41 percent in 2018-19 and has been showing a steady decline for the last five years. Petroleum subsidies have appreciably declined partly on account of reform measures and partly due to decline in crude prices. LPG subsidies have reduced also due to the Give-it-up campaign. Petroleum (2010) and Diesel (2014) stands decontrolled. For DBTL, consumer pays market price and subsidy is directly credited to bank account. Families above ₹10 lakhs annual income are excluded. For Kerosene, for effecting voluntary cuts in Kerosene allocation, states are being given incentives in form of percentage of the consequential savings in subsidy. There has been a 20 percent reduction in allocation of Kerosene from the year 2015-16. All States/UTs have adopted National Food Security Act (NFSA), 2013 and implementation of NFSA became universal from 1st November 2016, covering 80 crore beneficiaries.

Reform Measures initiated:

In respect of food subsidy pilots have been conducted in Puducherry, Chandigarh and Urban areas of Dadra and Nagar Haveli for DBT in food. Out of more than 5 lakhs ration shops, around 1.80 lakhs have been provided with PoS machines. The process of digitalisation, Aadhar seeding, de-duplication has resulted in better targeting. In fertilizer 100 percent neem coating of Urea, Use of soil health cards, DBT are in force.

Future projections of subsidy:

Amount of Petroleum subsidy is dependent on international crude prices. Increase in international crude price will result in increase in the subsidy bill. With the introduction of DBT, 'give it up' campaign and exclusion of families with annual income of ₹10 lakh and above, LPG subsidy has been contained. However, under Pradhan Mantri Ujjawala Yojana (PMUY), 8 crore new connections are given. These new connection will result in increase in LPG subsidy. However, 20 percent reduction in kerosene subsidy will result in decreasing the amount of subsidy.

Regarding fertilizer subsidy, efforts are made to contain the subsidy bill at the existing level. It is expected that DBT will result in targeted distribution of subsidy by

removing ghost beneficiaries and de-duplication of beneficiary. Food subsidy is expected to grow with the increase in Minimum Support Price (MSP). Department of Food and Public Distribution has projected 10 per cent year on year increase in the amount of Food subsidy. Efforts are made to contain the same by rationalizing the procurement and storage operations and also by bringing efficiencies to reduce the economic cost of operations undertaken by FCI. The digitalization of database of beneficiaries will also make it more targeted.

f) Other Revenue Expenditure:

This category includes mainly expenditure on various schemes/programs of the Government, Grant-in-aid other than GiA salary given to States, local bodies and autonomous institutions and other establishment related expenditure of various Ministries/Departments etc.

MTEF Statement includes projections in respect of certain schemes, which is presented in part D of the Statement. These schemes include all Centrally Sponsored Schemes and some major Central Sector Schemes. The scheme-wise projections include revenue-capital breakup of schemes. It is projected that the revenue component of these schemes will increase from the budgeted amount of ₹5,02,334 crore in 2018-19 to ₹5,47,778 crore in 2019-20 and ₹6,47,658 crore in 2020-21. The higher growth in 2019-20 is mainly on account of higher projection in respect of schemes pertaining to the area of health, education, agriculture and rural development etc. In percentage terms, an increase of about 9 percent is projected over BE 2018-19 in the year 2019-20. For the year 2020-21, an increase of about 18 percent is anticipated from the 2019-20 projections.

Centralised provisions for Grants to States mainly include Grants which are recommended by Finance Commission (Revenue Deficit Grants, Disaster Relief Grants to States & Grants to Local Bodies to States) and other grants/transfers viz., Special Assistance, Grants to autonomous Councils, Areas covered under sixth Schedule of the Constitution and Additional Central Assistance for Externally Aided Projects etc. Finance Commission grants are given to state Governments. These recommendations are derived from Art 275 (1) of the Constitution of India. Finance Commission Grants are projected to increase to ₹1,46,455 crore and ₹1,56,706 crore in 2019-20 and 2020-21 respectively. FC Grants are estimated at ₹1,36,874 crore in BE 2018-19.

2) Capital Expenditure:

Capital Expenditure for the year 2017-18 was ₹2,63,704 crore (prov.). In comparison, Capital Expenditure has been budgeted at ₹3,00,441 crore in BE 2018-19. This is expected to increase by 8.9 percent in 2019-20, to ₹3,27,197 crore. In 2020-21, an increase of about 15 percent is projected over previous year. The Capital Expenditure projections in absolute terms for the year 2020-21 is anticipated to be ₹3,76,093 crore. This implies that the share of capital in total expenditure has remained roughly constant in the short –run at 12.3 percent. In 2017-18 (Prov) it was 12.3 per cent and in BE 2018-19 also it is estimated to be 12.3 percent. However, in medium term capex is expected to nudge up to 12.4 percent in 2019-20 and 12.8 percent in 2020-21. As a percent of GDP, capital expenditure will remain constant at 1.6 percent both in the near and the medium term scenario.

a) Defence

The major increase in capital expenditure is expected in capital outlays in Defence. This component of capital expenditure is expected to rise from the budgeted amount of ₹99,564 crore to ₹1,06,353 crore in 2019-20 and ₹1,26,979 crore in 2020-21, implying an increase of 10 percent and 16 percent respectively.

b) Road Transport and Highways

Capital Expenditure on Road Transport and Highways has been given a push in the projected years. The Capital expenditure in this category was budgeted at ₹59,440 crore in BE 2018-19. It is expected that capital expenditure in roads and highways will increase to ₹63,601 crore in 2019-20 (7 percent year on year) in 2019-20 and to ₹76,907 crore in 2020-21 (20.92 percent).

c) Budgetary Support for capital expenditure of Railways

BE for Budgetary support to railways for capital expenditure is ₹53,060 crore. It is anticipated to increase to ₹56,774 crore and ₹68,096 crore in 2019-20 and 2020-21 respectively implying a normative growth of 7 percent in 2019-20 over BE 2018-19 and an enhanced growth rate of 19.94 percent over previous year allocation.

d) Other Capital Expenditure and underlying expenditure priorities

Apart from the categories of capital expenditure discussed above, capital expenditure in Finance category is also expected to go up from ₹13,248 crore in 2018-19 BE to ₹20,775 crore in 2019-20 and ₹21,919 crore in 2020-21. This anticipated increase is mainly on account of National Investment and Infrastructure Fund Scheme under Department of Economic Affairs.

3) Scheme Expenditure

MTEF Statement includes projections in respect of certain schemes, which is presented in part D of the Statement. These schemes include all Centrally Sponsored Schemes and some major Central Sector Schemes. On the revenue side, a growth of 9 percent over BE 2018-19 is expected in 2019-20, of 18 percent over previous year's projection in 2020-21. Enhanced allocations have been made in the schemes pertaining to health, education, agriculture, social justice and tribal affairs.

The total expenditure on the capital section of the selected schemes is expected to increase by around 10.5 percent in 2019-20 over BE 2018-19 and 64.3 percent over previous year projections in 2020-21. In absolute terms, the capital expenditure in these schemes, which is budgeted at ₹89,997 crore is expected to go up to ₹99,513 crore in 2019-20 and ₹1,63,563 crore in 2020-21.

It may be noted here that certain Ministries/Departments such as Ministry of Petroleum and Natural Gas, Ministry of Commerce, Ministry of Power, Ministry of Housing and Urban Affairs, ministry of Rural Development and Ministry of Skill Development and Entrepreneurship, were unable to provide the expenditure projection. The main reason for the same is conclusion of the scheme in the year 2019-20. In certain cases, approval for scheme extension is under process and therefore, concrete projection for 2020-21 is not available. It is, however, anticipated that the schemes will either continue or spill over till 2020-21. Hence, indicative expenditure projections have been provided with regard to such schemes.

C. MEDIUM-TERM EXPENDITURE PROJECTIONS (Demand wise and on net basis)
