Introduction

The Public Debt Management Cell (PDMC), Budget Division, Department of Economic Affairs (DEA), Ministry of Finance (MoF) has been bringing out a quarterly report on public debt management on a regular basis (https://dea.gov.in/public-debt-management). Accordingly, this report pertains to the period October-December of the fiscal year (FY) 2024-25, viz., Q3: FY 2024-25.

The report gives an account of the public debt management and cash management operations during the quarter and provides information on various aspects of debt management.

While all attempts have been made to provide authentic and accurate information, it is possible that some errors might have crept in inadvertently. Readers may inform us of such errors, if any, and provide their valuable suggestions to improve the contents of this report at pdmc-dea@gov.in.

Section 1:

Macroeconomic Developments

- 1.1 Amid strong headwinds to global growth, the recent data by MOSPI mirrored rebound in India's real GDP which grew by 6.2 per cent year-on-year (y-o-y) in Q3: FY2024-25, and increased from 5.6 per cent growth in the previous quarter. Real GDP growth in Q3: FY2024-25 was driven by private final consumption expenditure (PFCE), which rose to 6.9 per cent from 5.7 per cent in corresponding quarter a year ago and 5.9 per cent in Q2:FY2024-25. The increase in PFCE was supported by strong rural consumption following a favorable monsoon. Further, Government final consumption expenditure also rose by 8.3 per cent in Q3: FY2024-25, significantly outpacing the 2.3 per cent growth recorded in the previous year's corresponding quarter. The International Monetary Fund's (IMF) recent Article IV report forecasts India's real GDP growth at 6.5 per cent for 2024-25 and 2025-26, supported by resilient private consumption and sustained economic and financial stability.
- 1.2 India's industrial output, measured by the Index of Industrial Production (IIP), grew by 3.5 per cent (y-o-y) in December 2024. While manufacturing output growth moderated, mining and electricity generation expanded at a faster pace. The y-o-y growth for both mining output and electricity generation marked a five-month peak with growth of 2.7 per cent and 6.2 per cent respectively in December 2024. Moreover, the growth was a broad-based growth, with majority of use-based segments recording positive growth during the month. Data reflects that capital goods grew by 10.4 per cent followed by intermediate good and infrastructure goods, which experienced annual increase of 6.4 per cent and 7.4 per cent, respectively.
- 1.3 Retail inflation measured by Headline Consumer Price Index (CPI) eased to 5.2 per cent (y-o-y basis) in December 2024 relative to 5.5 per cent in September 2024. Inflation eased in December, primarily due to a sharp decline in vegetable prices along with lower prices for pulses, and sugar. Vegetables had been the main driver of food inflation for most of the fiscal year, with steady price increases from April to October, except in July and August. However, the vegetables prices eased in November and further in December, leading to reduced inflationary pressure. The change in CFPI declined to 8.4 per cent in

December and further to 6.0 per cent in January 2025, which was 10.9 per cent in October 2024. On the other hand, the Wholesale Price Index (WPI) registered an increase to 2.4 per cent in December 2024 relative to 1.9 per cent in September 2024 primarily due to broad-based surge in non-food inflation (Chart 1.1).

- 1.4 During Q3 of FY 2024-25, India's merchandise exports amounted to USD 109.0 billion, slightly higher than the USD 105.6 billion recorded in Q3 of FY 2023-24. During Q3: FY 2024-25, Indian petroleum product exports contracted by 36.2 per cent compared to the previous year, whereas exports of non-petroleum products rose by 12.5 per cent, supporting total merchandise exports for the period. Merchandise imports rose to USD 186.7 billion, marking a 6.0 percent increase from USD 176.1 billion in the same quarter last fiscal, with both petroleum and non-petroleum import registered positive growth. With imports surging faster than exports, trade deficit widened to USD 77.8 billion in Q3: FY 2024-25 from USD 70.5 billion in Q3: FY 2023-24.
- 1.5 The net foreign direct investment (FDI) moderated from USD 7.9 billion in April-December FY 2023-24 to USD 1.2 billion during April-December FY 2024-25, primarily due to an increase in outward FDI. On the financing side, net foreign portfolio investment (FPI) flows have remained positive at USD 9.3 billion during April-December FY 2024-25 relative to a net inflow of USD 32.7 billion in the corresponding period last year.

Table 1. 1: Foreign Investment Inflows

(In USD Billion)

| Year | Net FDI | Net FPI |
|-----------------------|---------|---------|
| Apr-Dec FY 2023-24 | 7.9 | 32.7 |
| Apr-Dec FY 2024-25(P) | 1.2 | 9.3 |

Source: Various issues of Monthly Bulletin, Reserve Bank of India (RBI)

Note: Figures are on a net basis

1.6 Crisil in its recent report projected India's economic growth to remain stable at 6.5 per cent in FY 2025-26, driven by private consumption recovery, monetary easing, and favorable commodity prices. Improved agricultural output and lower food inflation will boost household spending, while tax benefits and government employment schemes will further support consumer sentiment. However, weak private investment remains a concern as corporate capex growth lags.

Section 2:

Debt Management - Primary Market Operations

A. Government Finances

- 2.1 As per provisional estimates of the Controller General of Accounts (CGA), Central Government gross fiscal deficit as of end December 2024 stood at ₹9.14 lakh crore, which is 58.2 per cent of full year revised target of ₹15.69 lakh crore for FY 2024-25. This is lower than fiscal deficit in the corresponding period last year which stood at ₹9.82 lakh crore. The deficit was around 56.6 per cent of the full year revised target of FY 2023-24. The Union budget, forecasts to bring fiscal deficit to 4.8 per cent of GDP in FY 2024-25 and 4.4 per cent in FY 2025-26.
- 2.2 According to provisional CGA estimates up to December 2024, tax revenue reached ₹18.43 lakh crore, representing 72.1 per cent of the revised estimates (RE). Non-tax revenue amounted to ₹4.48 lakh crore, or 84.3 per cent of RE. By the end of December 2024, total expenditure stood at ₹32.32 lakh crore, covering 68.5 per cent of RE for FY 2024-25. Revenue expenditure was recorded at ₹25.47 lakh crore (68.9 per cent of RE), while capital expenditure rose to ₹6.85 lakh crore, compared to ₹6.74 lakh crore in the previous year's corresponding period. More details are available in Table 2.1.

Note- COPPY: Corresponding Period of the Previous Year.

Figures are provisional.

B. Issuance Details

2.3 The revised estimates for gross and net market borrowings for FY 2024-25 stand at ₹14,00,697 crore and ₹10,74,514 crore, respectively. The actual figures for gross and net market borrowings in Q3: FY 2024-25 and Q3: FY 2023-24 are presented in Table 2.2.

Table 2. 2: Issuance of Dated Securities

(Amount in ₹ crore)

| Gross Amount | 1400697 | 382000 | 1543000 | 385000 | 27.27% | 24.95% |
| Repayments | 237818 | 153880 | 362542 | 166792 | 64.70% | 46.01% |
| Switches: | | | | | | |
| Borrowing | 146794 | 31552 | 100290 | 24888 | 21.49% | 24.82% |
| Repayment | 146995 | 31424 | 102994 | 25312 | 21.38% | 24.58% |
| Net | -201 | 129 | -2704 | -424 | | |
| Buyback | 88164 | 49388 | 0 | 0 | | |
| Net Issuance | 1074514 | 178861 | 1177754 | 217784 | 16.65% | 18.49% |

Note: Repayment of 2024-25 RE includes buyback of ₹ 30,248 crores for securities maturing during FY 2024-25. Repayment is net of recovery from GST Compensation Fund for both 2023-24 and 2024-25 RE.

2.4 In the third quarter of FY 2024-25, a total of 12 weekly auctions for dated securities were held, raising ₹3,82,000 crore. The net borrowing through these securities was ₹1,78,861 crore, lower than the ₹2,17,784 crore raised in Q3 of FY 2023-24 (including switch). The government allocated issuances across different tenures, aligning with market demand and its own maturity preferences. The 10-year benchmark security dominated issuance at 24.3% of gross issuance, followed by 40-year (15.7%) and 15-year (13.4%) G-Secs.

- 2.5 The tenor of new issuances of dated securities is a function of acceptable rollover risk as well as market appetite for various maturity segments. During Q3: FY 2024-25, the weighted average yield (WAY) on new issuances softened to 6.88 per cent while the weighted average maturity (WAM) of issuances remained around 20.47 years.
- 2.6 The government has projected a net borrowing of (-) ₹89454 crore through T-bills in FY 2024-25. During Q3: FY 2024-25, ₹3,97,591 crore was raised via Treasury Bills, with ₹3,84,789 crore in repayments. Net issuances amounted to ₹12,802 crore in Q3: FY 2024-25, compared to (-) ₹76,167 crore in the same period of FY 2023-24. Further issuance details for both quarters are available in Table 2.4.

Section 3:

Cash Management

- 3.1 Government's cash account is maintained with the Reserve Bank of India (RBI). The temporary cash flow mismatches, in case of deficit in the cash account of the Central Government, are largely managed through a combination of issuance of Treasury Bills, Cash Management Bills (CMBs) and access to the Ways and Means Advances (WMA) facility from RBI. Surplus cash balances in Government cash account are lent in market (through RBI) or may be used for buy-back of securities from the market. Further, the RBI conducts purchase/ sale of G-Secs under its Open Market Operations, whenever required, based on its assessment of prevailing and evolving liquidity conditions.
- 3.2 During Q3: FY 2024-25, the Central Government's cash balance was predominantly in surplus, with WMA being availed on eight occasions. Furthermore, no CMBs were issued in the quarter.

3.3 During the Q3: FY 2024-25, in the latter half of November 2024, system liquidity moderated due to the accumulation of government cash balances from GST collections, increased currency circulation, and capital outflows. Liquidity was in deficit in the final week of November before improving in early December, supported by higher government spending which went to deficit between December 16-19, 2024, driven by

advance tax payments. However, on average, system liquidity remained in surplus during Q3: FY 2024-25, with average daily net absorption under LAF including Marginal Standing Facility (MSF), Standing Deposit Facility (SDF) and Special Liquidity Facility (SLF) stood at ₹0.73 lakh crore. On March 05, 2025 the RBI plans to purchase bonds worth ₹1 trillion and conduct a \$10 billion three-year FX swap to boost rupee liquidity.

- 3.4 RBI in its latest Monetary Policy Committee (MPC)¹ Report highlighted that in a world marked by geopolitical tensions and trade uncertainties, monetary policy faces significant challenges in maintaining macroeconomic and financial stability. Strong policy frameworks and robust macroeconomic fundamentals are essential for resilience. Domestically, there is a focus on sustaining high growth while ensuring price stability, requiring a balance between inflation and growth through monetary policy tools. The RBI expects economic activity to improve, with strong agriculture performance and a gradual recovery in manufacturing. The services sector remains resilient, despite a slight decline in PMI services. Accordingly, for the first time in nearly five years, the Reserve Bank of India (RBI) has lowered its key repo rate unanimously by 25 bps, aiming to provide stimulus to the ailing economy. Consequently, Standing Deposit Facility (SDF) and Marginal Standing Facility (MSF) rate changed to 6.00 per cent and 6.50 per cent respectively.
- 3.5 The net amount mobilised through Treasury Bills (under competitive bidding) stood at (-) ₹30821 crore and ₹43,623 crore under non-competitive bidding in Q3: FY 2024-25. Details of issuances and redemptions of treasury bills (tenor-wise) in Q3: FY 2024-25 are given in Table 3.1.

Yield on Primary Issuances of G-Secs and Maturity of Outstanding Stock of Market Loans

4.2 During the quarter, the yield in Indian domestic bond surged primarily influenced by rising US treasury yields and higher inflation. However, in late November, the yield remained mostly stable despite US treasury yield hikes. Further, in December, 2024, yield dropped to a three-year low due to expectations of monetary policy easing. Consequently, the yield curve then shifted downward in the mid-segment, with the term spread stabilizing. The weighted average yield on issuance during the quarter softened to 6.88 per cent relative to 6.94 per cent in Q2: FY 2024-25 and 7.37 in Q3: FY 2023-24. Further, the weighted average maturity of issuances remained at 20.47 years in Q3: FY 2024-25. On the other hand, the weighted average maturity of outstanding stock of dated securities enhanced to 13.24 at end December 2024 relative to 12.96 years at the end of Q2: FY 2024-25.

| | | | | |

^{*:} As at the end of period.

4.3 The maturity profile of outstanding Government debt as on end December 2024 mirrors elongation of maturity profile of outstanding Government debt with the proportion of debt (dated securities) maturing in 20 years and above stood at 23.8 per cent at end-December 2024 (23.7 per cent at end-September 2024). On the other hand, the proportion of debt maturing within 1-5 years at 22.8 per cent at end-December 2024 in contrast to 21.8 per cent at end-September 2024. Debt maturing in the next five years worked out to 26.0 per cent of total outstanding debt at end-December 2024, *i.e.*, 5.2 per cent of outstanding stock, on an average, needs to be repaid every year over the next five years. Thus, the roll-over risk in dated securities portfolio remains low (**Table 4.3**).

Table 4.3: Maturity Profile of Outstanding Dated Securities of Central Government

(Amount in ₹ crore)

| Maturity Buckets (Residual Maturity) | Quarter at the end-December 2024 | Quarter at the end-September 2024 |
|---|----------------------------------|-----------------------------------|
| Less than 1 year | 352343 (3.2) | 431193 (4.0) |
| 1-5 years | 2499477 (22.8) | 2357649 (21.8) |

| Total | 10988608 | 10809747 |

Note: Figures in parentheses represent per cent of total

Ownership Pattern

- 4.4 The ownership pattern of Central Government securities indicates that the share of Commercial Banks increased to 37.98 per cent at end December 2024 as compared to 37.55 per cent in September 2024. Further, the share of Insurance Companies also increased 26.14 per cent at end December 2024 relative to 25.95 in September 2024. On the other hand, Mutual Funds and Corporates, share moderated to 3.11 per cent and 1.45 per cent at end December 2024 respectively relative to end September 2024. The share of RBI continues to decline to 10.55 per cent at the end of December 2024 (**Table 4.4**).
- 4.5 In case of treasury bills, majority holding of Commercial Banks was at 40.45 per cent at December 2024. The ownership pattern reflects that at end December 2024 the share of Others increased to 25.29 per cent primarily on the back of increase in share of State government compared 19.65 in September 2024. (**Table 4.5**).

Section 5:

Secondary Market

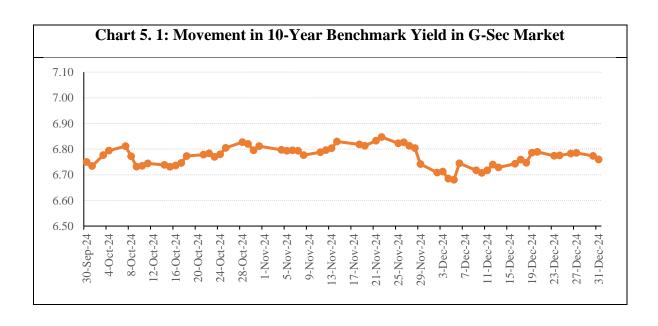

A. Government security yields

5.1 During Q3: FY 2024-25, yields on government securities have hardened across the yield curve. The hardening of yields was attributed to status quo by RBI in its monetary policy announced in October and December 2024, depreciation of the Rupee against Dollar, tight liquidity condition as well as hardening of US treasury yields.

The major factors which affected the secondary market during the quarter are as under:

- (i) The RBI left the policy repo rate unchanged at 6.5 per cent in its October and December 2024 monetary policy meeting and maintained the LAF corridor at 50 bps. Accordingly, Marginal Standing Facility (MSF) rate and Bank Rate remains unchanged at 6.75 Per cent. The Cash Reserve Ratio (CRR) has been reduced to 4 per cent of NDTL from 4.5 per cent in two equal tranches of 25 bps in December policy. The stance was also changed from "withdrawal of accommodation" to "Neutral" in October policy. The status quo on the rate is since February 2023.
- (ii) On the global front, US Federal Reserve announced a rate cut of 25 bps in its policy meeting in December, thus bringing the policy rate down to 4.25 4.5 per cent. This policy rate cut lead to a cumulative cut of 100 bps in CY 24. However Federal Reserve cautioned that rate cut might be slower in calendar year 2025, depending upon evolving inflation condition. The cautious approach led to hardening of US treasury yields.
- iii) Brent crude prices also inched higher during the quarter due to escalation of tension between Israel and Iran, raising fears of middle east disruptions. The Brent crude price increased from 71.95 \$/bbl as on 30th September, 2024 to 74.78 \$/bbl as on 31st December, 2024.
 - iv) Depreciation of Rupee also contributed in hardening of yields. The rupee depreciated from 83.79 against a Dollar as on 30th September 2024 to 85.62 against a Dollar on 31st December, 2024 thus breaching the psychological level of 85. The adverse currency movement has also affected the government yields during the quarter.

- v) Overall, the yields on government securities hardened during the quarter across the curve. The yield on 10-year benchmark security hardened from 6.75 per cent at the close of the quarter on September 30, 2024 to 6.76 per cent at the close on December 31, 2024, thus hardening by 1 bps during the quarter. However, more hardening of yields was observed in longer tenure securities.
- 5.2 The other factors which affected secondary market during the quarter under the review were as under:
 - a) Inflation: The headline retail (CPI) inflation for the month of October, November and December 2024 was registered at 6.21 per cent, 5.48 per cent and 5.22 per cent reflecting a downward trend mainly due to moderation in food as well as in fuel and light segment. The October inflation of 6.21 per cent was highest level in 14 months. The surge was due to significant increase in food prices particularly in the vegetable prices. However, it gradually cooled down during the quarter.
 - b) Wholesale Price Index (WPI) inflation was at 2.75 per cent in October, 2.16 per cent in November and 2.37 per cent in December, 2024. The elevated level of WPI during the quarter was due to rise in food prices, manufacturing food products and edible oils. Fuel and Power items remained in deflationary trend whereas manufacturing products which have the largest weight contributed to rise in inflation.
- 5.3 The spread in yields between 10-1 year was at 8 bps as on 31st December, 2024, against 23 bps as on September 30, 2024 reflecting more hardening of yields in shorter term security in comparison to 10-year security, due to prevailing liquidity condition.

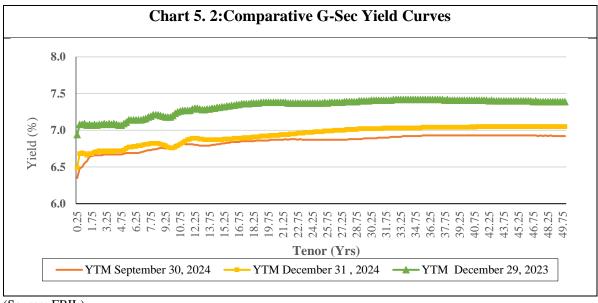

The yields spread in 30-10-year segment was 26 bps on 31st December, 2024 against 11 bps as on September 30th 2024 reflecting hardening of yields in longer tenure security. Hardening of yields were also observed in 5-year security and 30 years security by 5 bps and 13 bps respectively as on December 2024 quarter end in comparison to September quarter end. The hardening of yields was due to the reasons mentioned above. (Table 5.1 and Chart 5.2).

Table 5. 1: Yield Spreads (bps)

| Yield spread between | 30-09-2024 | 31-12-2024 | 29-12-2023 |
|----------------------|------------|------------|------------|
| 10-1 year | 23 | 8 | 11 |
| 30-10 year | 11 | 26 | 20 |
| 30-1 year | 34 | 34 | 31 |
| 10-5 year | 10 | 3 | 11 |

(Source: FIBIL)

5.4 Yields on government securities hardened across the yield curve, however more hardening of yields were observed in longer tenure securities in comparison to 10-year segment.

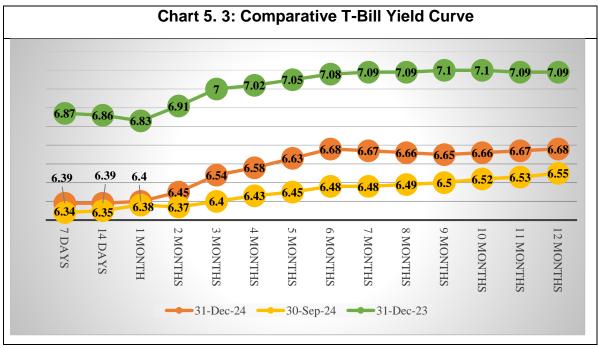

(Source: FBIL)

5.5 The hardening of yields was also observed in T-Bills during the quarter due to prevailing liquidity condition.

The yields of 3 months T-Bills were at 6.54 per cent as on December 31, 2024 against 6.40 per cent as on 30th September, 2024. The yields on 6-month and 12-month points were at 6.68

per cent on December 31, 2024, hardened by 20 bps and 13 bps, respectively, as compared to their closing levels on September 30, 2024. The yields on 3-months, 6-month and 12-month points on December 31, 2024 were lower by 46 bps, 40 bps and 41 bps respectively over their corresponding levels as on December 31, 2023 (**Chart 5.3**).

(Source: FBIL)

Table 5. 2: Yields on T-Bills of different tenors

| Date | 3 Months | 6 Months | 9 Months | 12 Months |
|----------------------------------|----------|----------|----------|-----------|
| 31st December, 2024 | 6.54 | 6.68 | 6.65 | 6.68 |
| 30 th September, 2024 | 6.40 | 6.48 | 6.50 | 6.55 |
| 31st December, 2023 | 7.00 | 7.08 | 7.10 | 7.09 |

(Source: FBIL)

5.6 US treasury yields hardened during the quarter and mostly affected by Federal Reserve action, inflation and employment data. US 10-year yields touched a high of 5.07 per cent during first week of November and low of 4.35 per cent during 1st week of October 2024 just after the aggressive rate cut by Federal Reserve during 3rd week of September 2024.

Brent crude prices also inch higher during the quarter due to escalation of tension between Israel and Iran, raising fears of supply concern. Crude oil prices closed at $74.78 \$ / bbl at the end of the quarter on 31^{st} December, 2024 against level of $71.95 \$ / bbl registered at the end of quarter on 30^{th} September, 2024.

B. Trading Pattern of Government Securities

- **5.7** The total outright volume of trading in G-Secs (including T-Bills and SDLs) at ₹ 38.23 lakh crore during Q3 FY 2024-25, showed a y-o-y increase of 34.70 per cent compared to ₹ 28.38 lakh crore during Q3 of FY2023-24 (**Table 5.4**). However, it is lower than ₹ 44.61 lakh crore registered during previous quarter.
- 5.8 The share of Central Government dated securities in the total outright volume of transactions in Q3 FY 2024-25 was registered at higher level of 85 percent in compare to 81 per cent registered Q3 of FY 2023-24. The share of Central Government securities in repo transactions increased to 80 per cent during Q3 FY 2024-25 compared to 73 per cent registered in corresponding quarter of FY 2023-24.
- 5.9 The annualised outright turnover ratio for G-Secs (including T-Bills and SDLs) for Q3 FY 2024-25 was higher at 3.45 (2.81 during Q3 of FY 2023-24). The annualised total

turnover ratio (outright plus repo transactions) also increased to 11.72 during Q3 FY 2024-25 from 11.50 during Q3 of FY2023-24.

5.11 The trend in outright trading volumes in central G-Secs under different maturity buckets is given in **Table 5.6**.

Table 5. 6: Maturity Buckets-Wise Outright Trading Volume in G-Secs (in ₹ cr)

| Maturity | Oct – Dec | % | % July – Sept | | Oct – Dec | % |
|-------------------|-----------|--------|---------------|--------|-----------|--------|
| | 2024 | share | 2024 | share | 2023 | share |
| Less than 3 years | 2,10,181 | 6.44 | 1,83,169 | 4.82 | 1,65,826 | 7.24 |
| 3-7 years | 4,95,275 | 15.18 | 5,97,994 | 15.73 | 3,73,215 | 16.30 |
| 7-10 years | 19,61,153 | 60.09 | 22,94,574 | 60.36 | 12,17,535 | 53.18 |
| Above 10 years | 5,96,836 | 18.29 | 7,25,487 | 19.09 | 5,33,136 | 23.28 |
| Total | 32,63,445 | 100.00 | 38,01,224 | 100.00 | 22,89,712 | 100.00 |

5.12 The maturity distribution of secondary market transactions in Central G-Secs, as presented above, shows that the trading activity was concentrated in 7-10-year maturity bucket during Q3 FY 2024-25, mainly because of more trading in 10-year benchmark security. It is also observed that trading activity in shorter tenure securities (less than 3 years segment) have increased during the quarter.

5.13 Private Sector Banks emerged as dominant trading segment in secondary market during quarter under review with a share of 25.94 per cent in "Buy" deals and 25.48 per cent in "Sell" deals in the total outright trading activity (Table 5.7), followed by public sector banks, primary dealers, foreign banks, and mutual fund. On a net basis, foreign banks and

primary dealers were net sellers while public sector banks, private sector banks, co-operative banks, insurance companies, FIs, mutual funds and 'Others' were net buyers in the secondary market
