Report on 'India's External Debt as at end-September 2012' is prepared in the External Debt Management Unit of the Ministry of Finance under the overall guidance of Shri Anil Bisen, Economic Adviser and Shri Sunil Saran, Additional Economic Adviser. The task of Report writing and co-ordination has been undertaken mainly by Dr. Rajmal, Officer on Special Duty. Data compilation was assisted by Sh. J.K. Rathee, Assistant Adviser and Smt Meera. The Hindi Section has provided valuable support in translation and Budget Press in Desktop publishing (DTP) and printing work.

INDIA'S EXTERNAL DEBT **(At end-September 2012)**

As per the standard practice, India's external debt data are disseminated on a quarterly basis with a lag of one quarter. Statistics for the first two quarters of the calendar year (ending March and June) are compiled and released by the Reserve Bank of India, while the data for the last two quarters (ending September and December) are compiled and released by the Ministry of Finance, Government of India. In addition, Government of India brings out an Annual Status Report on External Debt that contains detailed analysis of external debt position of the country. The major developments relating to India's external debt at end-September 2012 are presented below.

Major Highlights

- (i) At end-September 2012, India's external debt stock was US\$ 365.3 billion, recording an increase of about US\$ 20.0 billion (5.8 per cent) over the level at end-March 2012. In rupee terms, it increased from ₹ 17,65,333 crore at end-March 2012 to ₹ 19,31,688 crore at end-September 2012, reflecting an increase of 9.4 per cent.
- (ii) The rise in external debt is largely due to higher NRI deposits, short-term debt and commercial borrowings. NRI deposits alone accounted for 42.1 per cent of the rise in total external debt at end-September 2012 over the level of end-March 2012, while short-term debt and commercial borrowings together accounted for 52.6 per cent of the rise in debt during the period.
- (iii) The valuation effect due to appreciation of US dollar vis-à-vis major international currencies contributed a decline of US\$ 5.7 billion in the debt stock at end-September 2012 over the end-March 2012. This implies that excluding the valuation effect, the increase in debt would have been higher by US\$ 25.7 billion at end-September 2012 over the end-March 2012 level.
- (iv) Short-term debt (original maturity) accounted for 23.1 per cent of India's external debt, while the remaining (76.9 per cent) was long-term debt. Component-wise, the share of commercial borrowings stood at 29.8 per cent in total external debt, followed by NRI deposits (18.3 per cent) and multilateral debt (13.9 per cent).
- (v) The share of Government (Sovereign) and non-Government debt in the total external debt were 22.3 per cent and 77.7 per cent respectively, at end-September 2012.
- (vi) The share of US dollar denominated debt continued to be the highest in external debt stock at 55.7 per cent at end-September 2012, followed by the Indian rupee (22.9 per cent), Japanese yen (8.6 per cent), SDR (8.1 per cent) and euro (3.2 per cent).
- (vii) India's foreign exchange reserves provided a cover of 80.7 per cent to the total external debt at end-September 2012 vis-à-vis 85.2 per cent at end-March 2012.
- (viii) The ratio of short-term external debt (original maturity) to foreign exchange reserves stood at 28.7 per cent at end-September 2012 (26.6 per cent at end-March 2012).
- (ix) The ratio of concessional debt to total external debt declined to 13.2 per cent at end-September 2012 from 13.9 per cent at end-March 2012.

1. External Debt Stock

1.1 India's total external debt stock was US\$ 365.3 billion at end-September 2012, showing an increase of about US\$ 20.0 billion (5.8 per cent) over end-March 2012 level (Table 1). The long-term external debt increased by US\$ 13.6 billion (5.1 per cent) to US\$ 280.8 billion, while short-term debt registered an increase of US\$ 6.3 billion (8.1 per cent) to US\$ 84.5 billion. Thus, the maturity profile of India's external debt continues to be dominated by long-term loans. Annex I and II present the disaggregated data on external debt outstanding for the period March 2010 to September 2012 in Indian rupee and US dollar, respectively.

Table 1: Composition of India's External Debt

Sl. No.	Components	External Debt Outstanding (US\$ million) at end of			Absolute Variation (US\$ million)		Percentage Variation

PR: Partially Revised.

QE: Quick Estimates.

Figures in parenthesis indicate their respective percentages to total external debt.

1.2 The increase in India's external debt at end-September 2012 over end-March 2012 has been primarily on account of higher NRI deposits, short term debt and external commercial borrowings. These three components together contributed to 94.7 per cent of the total increase in the country's external debt. The increase in NRI deposits was largely due to rise in Non-resident external Rupee denominated ((NR(E)RA) deposits, reflecting deregulation of interest rates on these deposits.

1.3 India's external debt, that increased by 17.2 per cent at end-March 2011 over end-March 2010, stood at US\$ 345.4 billion at the end of March 2012, before rising by 5.8 per cent to US\$ 365.3 billion by the end of September 2012. Quarter-wise change in external debt since March 2010 is presented in below Table 2.

Table 2: External Debt Outstanding						(US\$ million)	
<i>At the end of</i>	Total External Debt	Variation					
		Over corresponding Quarter of previous year		Over Previous Quarter			
		<i>Amount</i>	<i>Per cent</i>	<i>Amount</i>	<i>Per cent</i>		
1	2	3	4	5	6		
March 2010	260,935	36,437	16.2	8,126	3.2		
June 2010	270,246	40,358	17.6	9,311	3.6		
September 2010	288,519	45,348	18.6	18,273	6.8		
December 2010	295,615	42,806	16.9	7,096	2.5		
March-2011	305,852	44,917	17.2	10,237	3.5		
June-2011	316,195	45,949	17.0	10,343	3.4		
September-2011	323,293	34,774	12.1	7,098	2.2		
December-2011	331,287	35,672	12.1	7,994	2.5		
March-2012	345,357	39,505	12.9	14,070	4.2		
June-2012	348,763	32,568	10.3	3,406	1.0		
September-2012	365,315	42,022	13.0	16,552	4.7		

2. Valuation Effect

2.1 The valuation effect* arises because external debt is denominated in different currencies, and the US dollar value which is the international numeraire for indicating debt numbers, fluctuates over time vis-à-vis these currencies. The US dollar appreciated against major international currencies between March 2012 and September 2012. Excluding the valuation effect, the increase in external debt between end-March 2012 and end-September 2012 would have been higher by US\$ 5.7 billion, to US\$ 371.0 billion (Table 3).

Table 3: Valuation Effect and Rise in External Debt				(US\$ billion)
1	2	3	4	
External debt at end-September 2012	Total Variation over end-March 2012	Valuation effect	Variation net of valuation effect	
	20.0	(-) 5.7	25.7	
365.3	Total Variation over end-June 2012	Valuation effect	Variation net of valuation effect	
	16.6	(+) 6.6	10.0	

* The Valuation Effect over a period (e.g. end-March to end-September) is calculated by applying start-of-the-period (e.g. end-March) exchange rates to end-of-the-period (e.g. end-September) currency components of the debt stock and comparing the resultant figure with the nominal end-of-the-period (e.g. end-September) debt-stock.

3. External Debt by Original Maturity

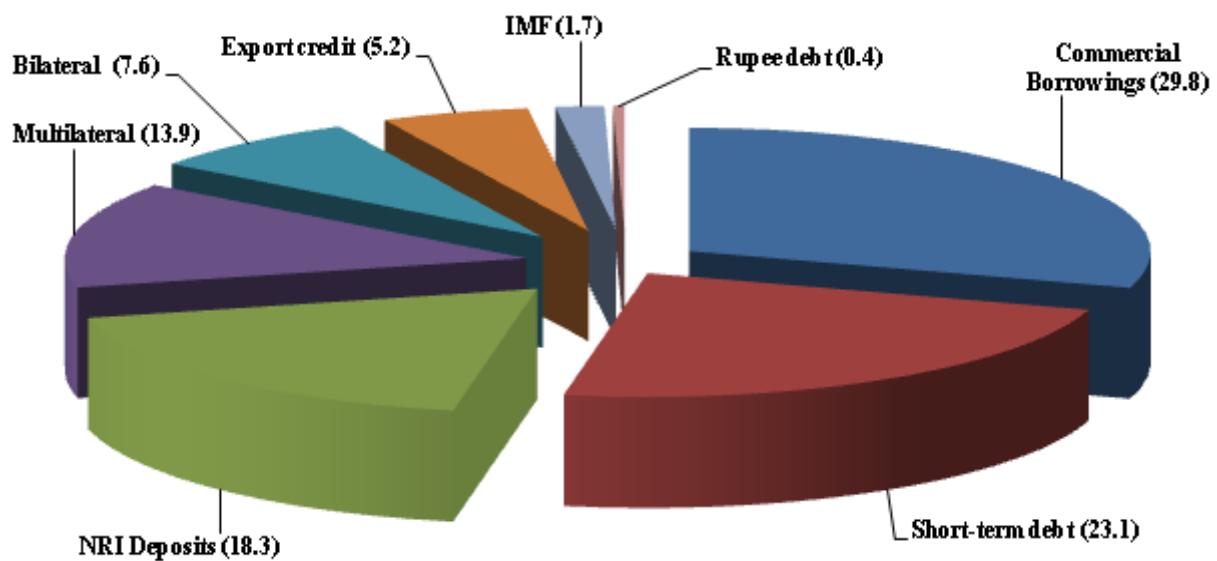

3.1 At end-September 2012, long-term external debt accounted for 76.9 per cent of total external debt. Of the total increase of US\$ 13.6 billion in the long-term debt between end-March and end-September 2012, NRI deposits and commercial borrowings accounted for an increase of US\$ 8.4 billion and US\$ 4.2 billion respectively, followed by bilateral credit (US\$ 0.9 billion), multilateral debt (US\$ 0.2 billion). Short-term debt increased by US\$ 6.3 billion to US\$ 84.5 billion during the period under consideration, representing 23.1 per cent of total external debt. Table 4 depicts the percentage share of different components in total external debt over the period 2007-2012.

Table 4: External Debt by Creditor Category (per cent)

Sl.	Category	at end-March						end-June	end-September
		2007	2008	2009	2010	2011	2012

R: Revised; PR: Partially Revised; QE: Quick Estimates

3.2 Chart 1 gives component-wise share of external debt at end-September 2012. Commercial borrowings and NRI deposits comprise the bulk (48.1 per cent) of India's external debt at end-September 2012.

Chart I: Component-wise share of India's External Debt at end-September 2012 (per cent)

4. Government and Non-Government External Debt

4.1 At end-September 2012, Government (sovereign) debt stood at US\$ 81.5 billion, while non-Government debt amounted to US\$ 283.9 billion. The share of Government debt in total external debt declined from 28.6 per cent at end-March 2007 to 23.7 per cent at end-March 2012 and further to 22.3 per cent at end-September 2012. The ratio of Government debt to GDP also posted a decline and remained in the range of 4.5 to 5.1 per cent over the past four years. Details of Government and non-Government debt are presented in Table 6 and Chart III. Creditor-wise details of sovereign external debt in Indian rupee and US dollar are placed at Annex III and IV respectively.

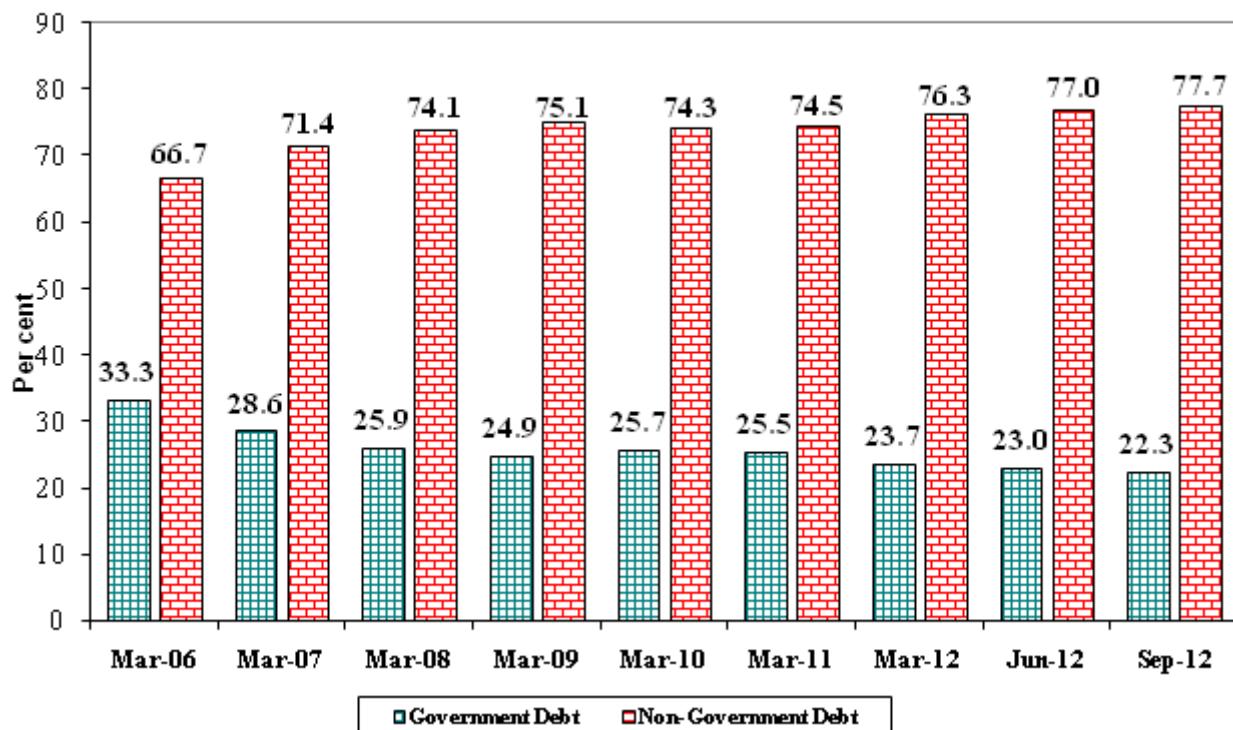

Table 5: Government and Non-Government External Debt Outstanding

PR: Partially Revised; QE: Quick Estimates.

Note: From March 2005 onwards, 'Other Government Short-term external debt' includes FII investment in Treasury Bills and from March 2007 onwards, it also includes investment in Treasury Bills by foreign central banks and international institutions.

Chart II: Share of Government and Non-Government External Debt in Total External Debt

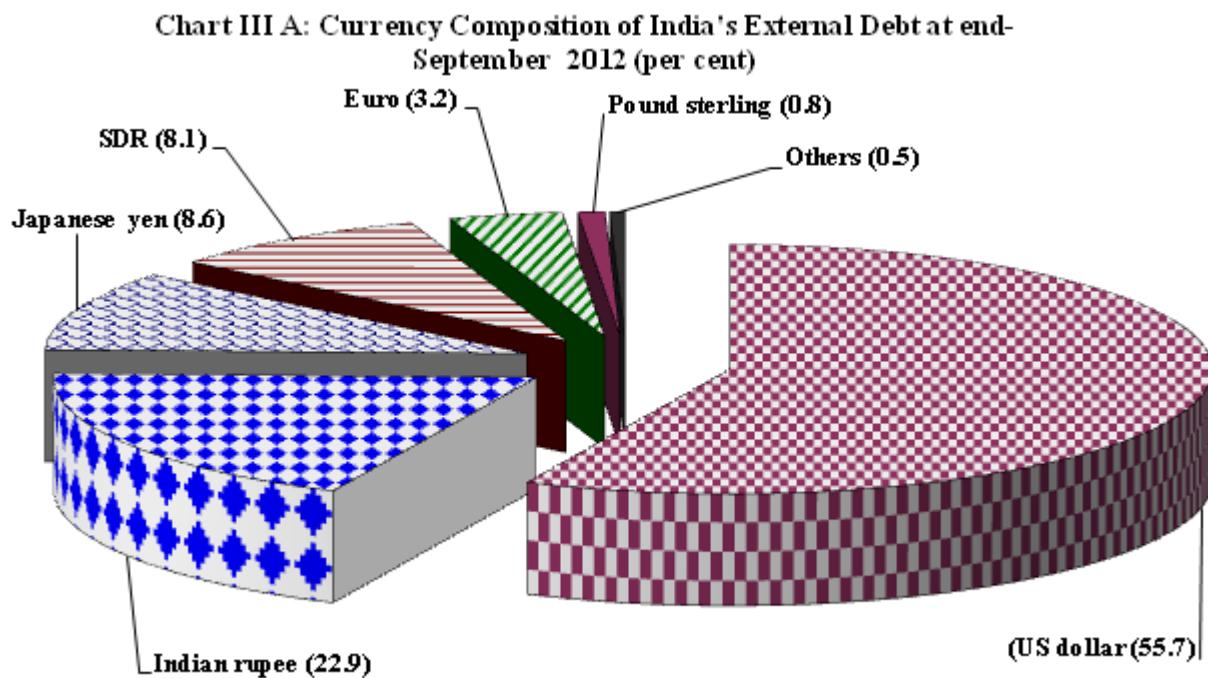

5. Currency Composition of External Debt

5.1 The currency composition of India's total external debt is presented in Table 6A and Chart IIIA. US dollar denominated debt accounted for 55.7 per cent of India's total external debt at end-September 2012, followed by Indian rupee (22.9 per cent), Japanese Yen (8.6 per cent), SDR (8.1 per cent) and Euro (3.2 per cent).

Table 6A: Currency Composition of India's External Debt
(As per cent to total external debt)

PR: Partially Revised. QE: Quick Estimates.

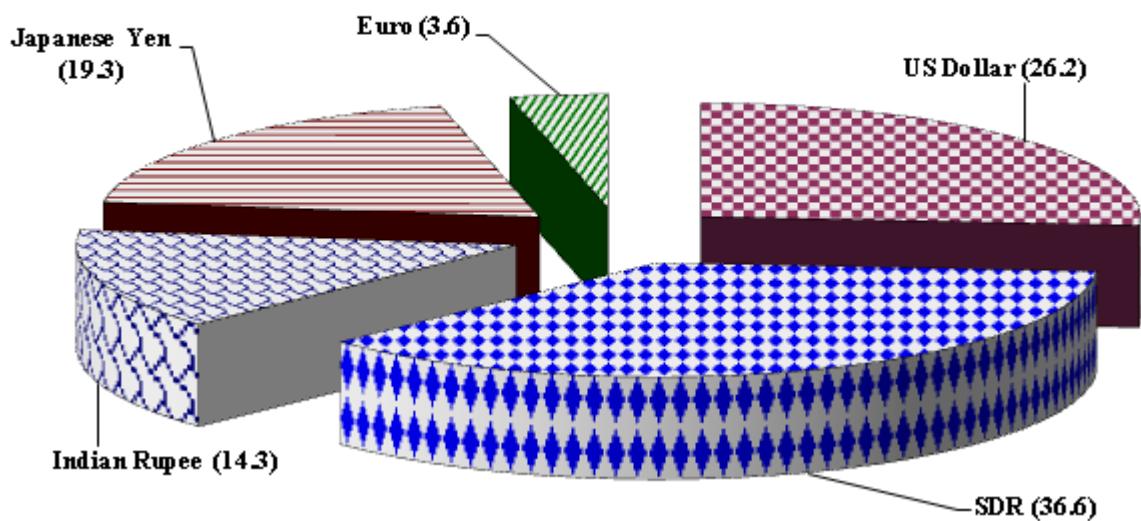

5.2 The currency composition of Sovereign debt indicates pre-dominance of SDR denominated debt (36.6 per cent), which is attributable to borrowing from the International Development Association (IDA) i.e. the soft loan window of the World Bank under the multilateral category and SDR allocations by the IMF. The share of US dollar denominated debt was 26.2 per cent at end-September 2012, followed by the Japanese yen (19.3 per cent) on account of borrowings from Japan (Table 6B and Chart IIIB).

Chart III B: Currency Composition of Government's External Debt at end-September 2012 (per cent)

6. External Debt Indicators

6.1 India's foreign exchange reserves provided a cover of 80.7 per cent to the total external debt stock at end-September 2012 vis-à-vis 85.2 per cent at end-March 2012. The ratio of short term to total external debt increased to 23.1 per cent at end-September 2012 from 22.6 per cent at end-March 2012. The ratio of short-term external debt to foreign exchange reserves was at 28.7 per cent at end-September 2012 as against 26.6 per cent at end-March 2012. The ratio of concessional debt to total external debt declined marginally to 13.2 per cent, reflecting the increasing share of non-Government debt. Key external debt indicators are presented in Table 7 and Annex V.

Table 7: India's Key External Debt Indicators (Percent)

Year	External Debt (US\$ billion)	External Debt to GDP	Debt Service Ratio	Concessional Debt to Total Debt	Foreign Exchange Reserves to Total Debt	Short-Term External Debt* to Foreign Exchange Reserves	Short-Term External Debt to Total Debt
1	2	3	4	5	6	7	8

End-Sept 2012 QE	365.3	-	-	13.2	80.7	28.7	23.1

PR: Partially Revised; QE: Quick Estimates. * Short Term External Debt is based on Original Maturity.

a. Works out to 6.3 per cent, excluding India Millennium Deposit repayments of US \$ 7.1 billion and pre-payment of US\$ 23.5 million.

7. International Comparison

7.1 India's key debt indicators compare well with other indebted developing countries. The Global Development Finance, 2012 of the World Bank, which contains external debt numbers for 2010, shows that India's position was fifth, in terms of absolute debt stock amongst the top twenty developing debtor countries. In terms of ratio of external debt to Gross National Income, India's position however was the fifth lowest. In terms of cover provided by foreign exchange reserves to debt, India's position was the fifth highest after China, Thailand, Malaysia and Russian Federation among the top twenty developing debtor countries. A comparison of the share of short-term debt in total external debt across countries reveals that India's position was the thirteenth lowest.

Table 8: International Comparison of Top Twenty Debtor Developing Countries, 2010						
Sl. No.	Country	Total External Debt Stocks (US\$ million)	Total Debt to Gross National Income (per cent)	Short-term to Total Debt	Debt Service Ratio (per cent)	Foreign Exchange Reserves to Total Debt (per cent)
1	2	3	4	5	6	7
1	China	548,551	9.3	63.4	3.3	531.2

Note: Countries are arranged based on the magnitude of debt presented in column no.3 in the Table.
Source: World Bank, Global Development Finance, 2012.

7.2 The Quarterly External Debt (QEDS) database, jointly developed by the World Bank and the International Monetary Fund, brings together detailed external debt data of countries that are subscribing to IMF's Special Data Dissemination Standard/General Data Dissemination System. The position in respect of the highly indebted developing countries and subscribers to this arrangement for the first two quarters of the calendar year 2012, which has been published by the World Bank (<http://go.worldbank.org/6V603CE490>) is placed at Annex VI.

8. External Debt Management

8.1 India's external debt has remained within manageable limits as indicated by the external debt to GDP ratio of 19.9 per cent and debt service ratio of 6.0 per cent in 2011-12. The active external debt management policy of the Government of India has helped in containing rise in external debt and maintaining a comfortable external debt position. The policy continues to focus on monitoring long and short-term debt, raising sovereign loans on concessional terms with longer maturities, regulating external commercial borrowings through end-use, all-in-cost and maturity restrictions; and rationalizing interest rates on Non-Resident Indian deposits.

PR: Partially Revised; QE: Quick Estimates.

IIFC(W): International Finance Corporation, Washington D.C.

FII: Foreign Institutional Investors

a Relates to SDR allocations from March 2004 onwards.

b Includes Financial Lease since 1996.

c Also includes India Development Bonds (IDBs), Resurgent India Bonds (RIBs), India Millennium Deposits (IMDs), also includes Foreign Currency Convertible Bonds (FCCBs) and net investment by 100% FII debt funds.

FCCB debt has been adjusted since end-March, 1998 after netting out conversion into equity and redemptions.

d Figures include accrued interest.

e Rupee denominated debt owed to Russia and payable through exports.

Note: NRO Deposits are included under NRI Deposits from the quarter ended June 2005. Supplier's Credits upto 180 days and FII investment in short-term debt instruments are included under short-term debt from the quarter ended March 2005. Vostro balances / Nostro overdrafts of commercial banks, balances of foreign central banks/international institutions have been included in external debt from the quarter ended March 2007.

Source: Ministry of Finance (Department of Economic Affairs), Ministry of Defence, Reserve Bank of India and the Securities & Exchange Board of India (SEBI).

PR: Partially Revised; QE: Quick Estimates.

IFC(W): International Finance Corporation, Washington D.C.

FII: Foreign Institutional Investors

a Relates to SDR allocations from March 2004 onwards.

b Includes Financial Lease since 1996.

c Also includes India Development Bonds (IDBs), Resurgent India Bonds (RIBs), India Millennium Deposits (IMDs), also includes Foreign Currency Convertible Bonds (FCCBs) and net investment by 100% FII debt funds.

FCCB debt has been adjusted since end-March, 1998 after netting out conversion into equity and redemptions.

d Figures include accrued interest.

e Rupee denominated debt owed to Russia and payable through exports.

f The definition of concessional debt here includes 'concessional' category under multilateral and bilateral debt and rupee debt under item VII.

Note: NRO Deposits are included under NRI Deposits from the quarter ended June 2005. Supplier's Credits upto 180 days and FII investment in short-term debt instruments are included under short-term debt from the quarter ended March 2005. Vostro balances / Nostro overdrafts of commercial banks, balances of foreign central banks/international institutions with RBI and investment in T-bills/securities by foreign central banks/ international institutions have been included in external debt from the quarter ended March 2007.

Creditor-wise Sovereign External Debt
